

Grigoriï Eleskin

Senior Backend Engineer

Go · Distributed Systems · Cloud Infrastructure

Georgia · LinkedIn: [linkedin.com/in/nyarum](https://www.linkedin.com/in/nyarum)

SUMMARY

Senior Backend Engineer with 10+ years of software engineering experience, specializing in backend and distributed systems. Most recently at 1inch, worked on Pathfinder, backend services and swap functionality across 20 blockchains. Previous experience includes event-driven analytics, AWS and Kubernetes infrastructure, and backend team leadership.

EXPERIENCE

1inch — Senior Backend Engineer

Jan 2023 – Sep 2026

- Worked on Pathfinder and backend services at 1inch, contributing to the backend of a blockchain-based swap product.
- Worked on swap functionality across 20 blockchains, with experience spanning Pathfinder and backend development in a multi-blockchain environment.

Faraway — Senior Golang Developer

Jan 2022 – Dec 2022 · Remote · Full-time

- Developed backend features for a blockchain game, contributing to the server-side functionality of the gaming product.
- Maintained and optimized AWS and Kubernetes infrastructure, combining backend feature development with hands-on cloud infrastructure work.
- Helped the team troubleshoot technical issues and improve system stability, supporting both backend development and infrastructure maintenance.

UserReplay — Senior Golang Developer

Jun 2020 – Nov 2021 · Remote · Full-time

- Integrated user behavior analytics features, contributing backend functionality to a product focused on understanding user interactions.
- Refactored an event-driven system to improve performance, working on the underlying backend as well as new analytics features.
- Implemented Terraform pipelines and maintained AWS clusters, supporting the cloud infrastructure alongside application-level development.

EXPERIENCE — CONTINUED**youwork.today — Technical Team Lead**

Dec 2018 – May 2020 · Remote · Full-time

- Led the backend team in developing new features and supporting existing functionality, using agile practices to organize the team's work.
- Worked on architectural improvements and refactored existing functionality for multiple third-party clients, combining technical leadership with hands-on backend development.

Mobalytics — Backend Developer

Oct 2017 – Oct 2018 · Remote

- Developed microservices for game analytics, contributing backend functionality to a product centered on gaming data.
- Introduced a beta solution for CS:GO analytics, adding game-specific analytics work alongside the broader microservices effort.
- Helped maintain system stability and resolve technical issues, balancing analytics feature development with ongoing backend troubleshooting.

EARLIER EXPERIENCE**Ronin Club — Software Engineer**

Mar 2017 – Oct 2017 · Remote · Contract

- Developed software features for outsourced clients, translating business requirements into application functionality and addressing the specific needs of external client projects.

SeeSaw Labs — Middle Golang Developer

Jul 2015 – Jan 2017 · Remote · Full-time

- Contributed to backend development and business logic solutions, focusing on the server-side behavior needed to support application functionality.

Iron.io — Middle Golang Developer

Sep 2016 – Dec 2016 · Remote · Freelance

- Developed a command-line utility for the Iron service, with an emphasis on making command-line interactions more usable and efficient.

AI ENGINEERING & AGENT WORKFLOWS

- Hands-on experience with Claude Code, Codex and OpenCode.
- Use my own modular Onepiece harness, enabling optional capabilities and extensions separately as needed.
- Prefer local Qwen models for privacy.
- Follow spec-driven workflows with a research-first approach.
- Verify work through live testing and evidence-based checks. Re-check previously validated work in a fresh context, independently of earlier conclusions.

TECHNICAL EXPERTISE

Languages: Go / Golang, Rust, Elixir, TypeScript, JavaScript, Dart, Zig

Backend & Systems: Backend Development, Distributed Systems, Event-Driven Architecture, Microservices, CLI Development

Cloud & Infrastructure: AWS, GCP, Kubernetes, Docker, Terraform

Delivery & Automation: CI/CD, GitHub Actions, Infrastructure as Code

Databases & Search: PostgreSQL, CockroachDB, MySQL, MongoDB, Elasticsearch

Messaging: NATS, Kafka, RabbitMQ

Observability: Prometheus, Grafana, Jaeger

Reverse Engineering: IDA Pro, OllyDbg, Wireshark, Protocol Reverse Engineering

AI & Agent Engineering: Claude Code, Codex, OpenCode, Onepiece, Local Qwen Models

Engineering Practices: Backend Team Leadership, Agile Development, Scrum

API & Networking: REST, gRPC, WebSockets, HTTP, TCP/IP, Protobuf

Go Engineering: Concurrency, Profiling, pprof, Benchmarking, Memory Optimization

Reliability: Incident Response, Root-Cause Analysis, SLO/SLI, On-call

Testing: Unit, Integration, End-to-End, Load Testing, Fuzzing

Security: OAuth 2.0, JWT, RBAC, Secrets Management

Blockchain Backend: EVM, JSON-RPC, ABI, Smart-Contract Integration, Transaction Lifecycle

Platform: Linux, Bash, Helm, Argo CD, GitOps

Caching: Redis, Cache Invalidation, Distributed Caching

CERTIFICATIONS & TRAINING

Scrum Developer Certificate

OPEN SOURCE & INTERESTS

I've open-sourced three game versions through more than a decade of reverse-engineering MMORPG protocols.

Interests include Zig and Gleam, low-level systems, functional programming and fault-tolerant backends.
